DIAMOND WIRE GRINDER

Machine necessary to dress diamond pearls assembled on a complete wire.

This machine is used to dress diamond pearls through a mechanized grinding wheel, putting on rotation the entire wire by a leading pulley and a serie of idle pulleys. The maximum length of the wire to dress is 100 metres. On request, it is possible to increase the length.

The machine is formed by a strong tubular iron structure.

The machine has a pneumatic cylinder to tension the wire, the motor of the grinding wheel has 5.5 Kw of power and the motor to drag the wire has 7,5 Kw of power.

The dressing grind is mounted on two axles, one of them has a numerical control.

Electric cabinet with an integrated control panel for machine parameters.

Machine dimensions: 6 metres long, 1 metre wide, 2,2 metres high.

The machine is CE certified.
